**Register Here**

**Back to Basics, Forward to Prevention: New York State Infection Prevention and Control Learning Series is a comprehensive, expert-guided program dedicated to promoting evidence-based infection prevention and control practices to prevent and contain multidrug-resistant organisms and other pathogens.**

**These complementary in-person half-day sessions are for hands-on infection prevention and control education. The afternoon session is a repeat of the morning session - please only register for one. We are unable to provide refreshments - please plan accordingly.**
